### Admin Control Center Help

## Admin Control Center Help

Welcome to the Admin Control Center. This application enables you to manage access to software licenses and Features.

Note: You can select the language in which Admin Control Center is displayed from the bottom of the **Options** pane.

The Admin Control Center enables you to monitor the following:

- All the Sentinel protection keys that are currently available on the network server, including their identity, type, and status.
- The number of users currently logged in to a protection key, and the maximum number of users allowed to be logged in.
- The Features to which each protection key allows access, and any restrictions that apply to the Feature.
- The users who are currently logged into a specific protection key, including detailed login information.

Note: SL UserMode keys are only displayed for the local (Windows) machine. SL UserMode keys are not displayed for remote machines.

You can perform actions, such as:

- Detaching a license from the network and attaching it to your machine or a different recipient machine
- Cancelling a detachable license prematurely
- Installing an update to a license on a key that is visible in Admin Control Center

You can make basic configuration changes, including:

w zakładce Configuration wpisać adres IP zdalnego klucza licencyjnego: 84.10.7.222
